Certificate

This is to certify that **Muhammad Saeed**, born 03.03.2001, has joined Livello GmbH from November 15th, 2023 to April 15th, 2024.

Livello GmbH is a tech and food startup building the future of autonomous retail and smart inventory management. We are developing a revolutionary IoT Platform and telemetric Smart Kiosks with state-of-the-art smart shelving and monitoring technology, leveraging newest technologies and engineering principles.

During the period of his with us, he worked as a Fullstack Developer on the following projects and tasks:

- Development of frontend and backend systems to enable users to manage kiosk prices from the mission control interface
- Implementation of a product deduction algorithm
- Integration of features related to logo customization in kiosks
- Implementation of functionality to set/get temperature features from both frontend and backend systems
- Development of sales features within the report section
- Integration and utilization of Auth0 API for user authentication
- Resolving numerous bugs and issues throughout the internship period

In addition to the technical aspects, he also acquired valuable experience in various areas:

- Adapting to an agile working environment
- Proficiency in utilizing GraphQL for both frontend and backend development
- Enhancing problem-solving skills through bug resolution
- Exposure to UI/UX principles and practices at the frontend

Mr. Saeed was highly motivated and interested in learning. He demonstrated great technical and teamwork skills, working both cooperatively and independently, taking on additional responsibility.

His performance exceeded expectations and he was able to complete the assigned projects successfully on time.

We are excited to keep working with him!

Düsseldorf, 10.04.2024
